DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a peptide and pharmaceutical products thereof, classified in class 514, subclass 9.
 - II. Claims 9-12, drawn to methods of using a peptide pharmaceutical product, classified in class 514, subclass 9.
2. The inventions are distinct, each from the other because:

Inventions I-II are distinct inventions as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be use in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the proteins of invention I can be used for immunoassays or biological markers.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. If Applicants choose either group I or group II, the Applicants must further elect one protein sequence by SEQ ID NO from the list of patentably distinct sequences of claim 1. The sequences disclosed in claim 1 are different in structure and function, and patentably distinct.

Art Unit: 1654

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. THIS IS NOT A SPECIES ELECTION.

Should applicant traverse on the ground that the proteins are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the proteins to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Dell Chism whose telephone number is 703-306-5815. The examiner can normally be reached on 7:30 AM - 4:30 PM, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback can be reached on 703-306-3220.
